Providing seedcorn and match funding for interdisciplinary research projects and supporting students to deliver their innovative projects.

Impacts are scalable and transferable to other organisations and to cities, addressing our global challenges such as climate, culture and energy, in the UK and internationally.

**WHERE IDEAS AND COLLABORATION THRIVE**

**Scalable & transferable**

A **WHOLE WORLD OF SUSTAINABLE SOLUTIONS**

The critical outcome for all the pilot projects in the Living Lab is the fact that they produce innovative and transformational solutions to real world problems, and that these solutions are scalable and transferable beyond the University. From climate change research and inspiring behaviour change to enhancing biodiversity, the Living Lab opens the door to a whole world of sustainable solutions.

As an educational institution, the Living Lab is encouraging us to think and operate differently; to take the theory from the classroom and apply it to real world situations. Funding, feasibility, research, testing and delivery are all undertaken by the project team, with results shared beyond the University to provide the evidence for real change.

You can apply to the Living Lab at any time by completing the application form online: [sustainability.leeds.ac.uk/the-living-lab](sustainability.leeds.ac.uk/the-living-lab)

Launched this year, the Living Lab is an exciting University-wide programme that uses our University as a test-bed for the co-creation of sustainable solutions. It relies on collaboration between students, academic and operational staff.
